DIFFERENCES DEVELOP

Senate Leaders Also Will Be Called Into Conference to Secure Harmony.

President Wilson is now giving deep study to the tariff, with a view to communicating views on the subject to the members of the Ways and Means committee of the House.

The President is now giving deep study to the tariff, with a view to communicating views on the subject to the members of the Ways and Means committee of the House.

It is understood that a copy of the tentative draft of the tariff bill prepared by Chairman Underwood and his associates will be placed in the hands of the President this week. He is expected to examine it, and make known his view concerning the measure.

It has been known within the past few days that President Wilson will, in all probability, make some suggestions relative to the agricultural schedule. This is the schedule which is being handled by the Ways and Means committee of the House.

Radical members of the committee have insisted that practically all farm products should be transferred to the free list. They wanted more than a tariff reduction on such products as wheat, corn, cotton, and other staples.
